CMEC Celebrates Five Years in Business

Thanks to our strong employees and valuable clients, we are pleased to have reached the five year milestone. Recently we have:

- Produced TxDOT **PCE, CE, and EA documents** plus conducted numerous QA/QC reviews and completed indirect and cumulative impacts sections from Amarillo to Corpus Christi under our Environmental Document Preparation contract;

- Performed **environmental compliance inspections** for Water Treatment Plant 4 and for waste relocation and Heritage Tree protection for Loop 360 landfill in Austin;

- Served as key environmental task lead with URS for DART's Union Station to Oak Cliff Streetcar EA (which won **FTA's Outstanding Achievement Award for Excellence in Environmental Documentation** in October 2011);

- Produced **wetland delineations** for Cibolo and Huebner Creeks in San Antonio for SAWS, for the DART Blue Line extension, and for road projects in the Bryan and Houston Districts and the North Region;

- Conducted **archeological and historic resources surveys** at Galveston airport, for several transmission lines, water/wastewater lines and roadways statewide, and for DART's Blue Line extension;

- Prepared invasive species clearing and planting plans for **Blackland Prairie Restoration** at the Formula 1 site.

CMEC Continues Growth with New Staff

- CMEC has expanded our full-time staff. **Jeff Allen, MS** is Senior Ecologist/Wetland Delineator and brings us 22 years of ecology experience; **John Huggins, MSCRP** has 10 years of experience and is leading our GIS department as we enhance data analysis capabilities; **Sara Laurence, MA** brings us 10 years of experience including extensive nautical archeological work plus GIS skills.

CMEC Thank You

CMEC wishes to thank our hardworking staff and clients who have provided work opportunities. **Thanks for Five Strong Years!!**
