Austin, TX 78731

CMEC Receives Award

In April 2010, we were honored to be named **Employer of the Year (2009)** by Women's Transportation Seminar, Heart of Texas Chapter.

CMEC is Full-Service for Cultural Resources

• **CMEC** now has full-service Cultural Resources capabilities: Archeological Surveys, Historic Structures Surveys, Historic Architecture, and Archival Research. We have all TxDOT Precertifications for CRM (2.7.1, 2.8.1, 2.9.1, 2.10.1, and 2.11.1).

CMEC Expands Staff

• In 2010, we were pleased to welcome several team members: **Alex Pugh** (BA Anthropology, UT Austin) heads our GIS Department. **Arthur Potts** (BS Wildlife Biology, Texas A&M) is a Biologist and Site Inspector. **Amy Connolly** (MS Wildlife Ecology, Texas State) is a Biologist and GIS Specialist. **Marques Green** (GIS, Texas State) is working at TxDOT on assignment for CMEC. **Celine Finney** (MHP, Univ. KY) leads our Architectural History/Preservation program.

CMEC Builds Skills

• Training has been extensive in 2010. For our work on the City of Austin's Water Treatment Plant 4 construction, staff members completed **OSHA 10-hour/30-hour Certification** for Construction. We completed **heavy rail safety training** for our work on the DART General Planning Consultant and Cotton Belt EIS teams. Other training included **HAZWOPER 40-Hour Certification**, **TNM Noise Modeling training**, **Southwestern Willow Flycatcher** survey training, and **Airport Wildlife Hazard Training**.

CMEC Project Update

Our projects have been wide-ranging and include wind projects, transmission lines, water/wastewater services, CDA support, and transportation work. We conducted Golden-Cheeked Warbler and Black-Capped Vireo surveys on more than 1,300 acres for LCRA and the City of San Antonio. **We look forward to working with our colleagues and clients in 2011!**
